# SAVE LEWISHAM HOSPITAL

# It's *our* NHS

- On February 4th, Secretary of State Jeremy Hunt will reveal his response to the recommendations of Trust Special Administrator Matthew Kershaw. These could result in the closure of Lewisham Hospital.
- Instead of sorting out the bad PFI deals in the South London Health Trust, the TSA has stepped outside his brief, proposing the closure of Lewisham Hospital's brand new A&E, as well as the childrens' wards, intensive care and maternity services. Elderly care will also be hit.
- He has also recommended the clearing of 60% of the hospital site at a huge loss of £35 million, as well as £100 million cuts to services in Greenwich, Bexley and Bromley.
- If this dangerous plan goes ahead, surrounding hospitals would be overwhelmed, so everyone in SE London will be very badly affected.
- PFI deals are bankrupting health trusts across the country. Lewisham is the first victim. We must stop this madness now before it destroys the whole NHS.
